

The Only Eco-Wall Skin

Pulp Art Surfaces, LLC is an innovator in dimensional wall skin production, offering affordable and eco-friendly dimensional wall skins to the television and motion picture industry, commercial productions, trade shows, theater and retail stores. We are the sole manufacturer of environmentally sustainable dimensional wall skins.

Q: What are PAS wall skins made from?

A: They're made from 100% recycled newspaper, cardboard and wood chips so they're recyclable, safe to work with, Green Dot compliant and conform to ISO 14000 standards.

Q: How durable are they?

A: PAS wall skins are approximately 3/16 inch thick so they're extremely durable. They don't crack when they're cut or stapled and they have a cushioning effect.

Q: Are PAS wall skins safe and easy to work with?

A: Yes! PAS wall skins are free of toxins and fire rated. Due to the thickness, they can be mitered and sanded. They have pre-trimmed finger joints, are flexible, strong and lightweight.

Q: How do they hold up to paint and/or water aging?

A: Our product paints well with any paint product. There's no need for a primer, they have great adhesion and hold up well with water aging.

Q: How many designs does PAS have available?

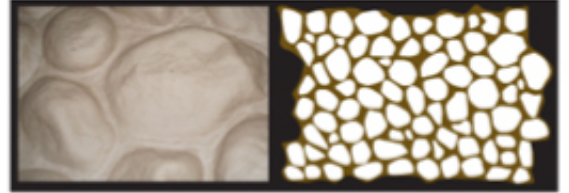

A: We currently have seven designs available: "Not So" Common Brick, "Exposed" Alley Brick, "Very" Cut Stone, "New" New York Brick, "Recast" Cement Block, "Reformed" River Rock and a Flagstone. Our complete catalog will include a wide variety of wall skins, including Marble Textures, Anaglyptas and many more Brick and Stone Textures.
